

The Sin Nature ([Romans 5:19](#))

1. Adam's one initial sin caused him to fall – depraved, degenerate, and his posterity is like his fallen self.
2. Every child of Adam is born with the Adamic nature, and, though this nature was judged by Christ on the Cross ([Rom. 6:10](#)), it remains a vitally active force in every believer's life.
3. It is never said to be removed or eradicated in this life, but there is for the believer overcoming power provided ([Rom. 8:4](#); [Gal. 5:16, 17](#)).
4. Both imputed sin and the sin nature are the direct result of Adam's one initial sin.
5. There is the immediate cause of death and an imparted sin nature by inheritance.
